

Safe, accurate and easy to use...

Honda was the first manufacturer to offer an in-car navigation system. With twenty five years experience and numerous customer satisfaction awards for navigation, you can be sure that you will be accurately guided to your destination. With the latest features like dynamic re-routing around traffic congestion, full Voice Control and a single DVD displaying data for all of Western Europe, the Civic Navigation System takes you further.

Your navigation system has been specifically created to complement the Civic driving experience. Fully integrated into the vehicle you can be assured that the system will be safe, extremely accurate and easy to use.

These specification details do not apply to any particular product which is supplied or offered for sale. The manufacturers reserve the right to vary their specifications, including colour, with or without notice and at such times in such manner as they think fit. Major as well as minor changes may be involved. Every effort, however, is made to ensure the accuracy of the particulars contained in this brochure. This publication shall not constitute in any circumstances whatsoever an offer by the Company to any person. All sales are made by the Distributor or Dealer concerned subject to and with the benefit of the standard Conditions of Sales and Warranty given by the Distributor or Dealer, copies of which may be obtained from him/her on request. Whilst efforts are made to ensure specification accuracy, brochures are prepared and printed several months in advance of distribution and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss specification details with the supplying Dealer or Distributor, especially if your model selection is dependent upon one of the features advertised.

Honda Civic Navigation System

Safe

We wanted the new Civic satellite navigation to match the inspired qualities of the car itself, so we created a totally integrated system from scratch. Designed specifically to complement the car's unique driving experience, it has some revolutionary features. Like intense clarity from a 7" LCD screen mounted in the dash which offers multiple views, including split screen, turn by turn, and detailed junction guidance.

Because safety is paramount in all Honda thinking, the Civic Navigation system has voice activation abilities, which means you can give verbal instructions without taking your eyes from the road and your hands from the wheel. The system will then 'talkback' and confirm instructions, so you know your request has been totally understood. This voice activation also controls audio and climate control without you having to lift a finger.

Accurate

With a single DVD covering all Western Europe, the Civic Satellite Navigation System will take you further, and with greater accuracy. Unlike ordinary GPS based systems, it's integrated with the car's infotainment system, which means it can access vehicle speed. This is vital, especially in urban areas where buildings, underpasses and bridges can restrict GPS data, making the difference between missing a turning or not. With both GPS and speed access you can drive to your destination with pinpoint accuracy. This integration also significantly reduces the risk of theft.

Easy to use

Navigation should be about making driving simpler, and that includes operation of the system itself. The Civic system is ultra simple. Operate at the touch of the Multi-jog Commander or by voice. Either way, the system provides up to five routes from your current position: the fastest, shortest, easiest., avoiding motorways and toll roads, and avoiding congestion charge zones. The Route Preview Screen provides distances, journey times, and an overview, allowing for a more informed selection.

Even if you don't have the full address, the system is so intelligent it can guide you to your destination using just its 7 digit postcode. It also provides over 2 million POIs (Points of Interest). Stored on the system's DVD it contains information on everything from amenities and activities to your nearest Honda dealer and your preferred choice of restaurant.

The Civic Navigation System helps you get the maximum from your journey with minimum effort.

Integrated Dynamic Route Guidance takes you round hold-ups

Traffic accidents and congestion are unpredictable and can happen at any time, but with the Civic's Navigation System having the additional benefit of Dynamic Route Guidance, they're not a problem. Because it's linked to Trafficmaster which constantly receives updates on traffic conditions, it can be programmed to automatically guide you around troublespots as you're on the move. It costs nothing but could save you hours of frustration and inconvenience.

Western Europe on one DVD means you can go further

Easy access to all features is straight to the point

2.2 million Points of Interest makes more of your journey

Five route overview option

Avoid the hold ups with Real time traffic information from Trafficmaster

Traffic incident information provides the detail

Split screen simplifies guidance

Find it quick! with Seven digit postcode input
